

SAGAR BHAWAL

Data Scientist

✉ sagarbhawalsb32@gmail.com ☎ 6296363354 📍 West Bengal, India 🔗 LinkedIn 🐙 GitHub

PROFILE

Aspiring Data Scientist with 6+ end-to-end ML, NLP, Generative AI and Power BI projects using Python, SQL, TensorFlow, LangChain, FAISS and Streamlit. Hands-on experience in predictive modelling, RAG systems, dashboard development and analytics on 100K+ record datasets through end-to-end projects.

SKILLS

Python | SQL | Machine Learning | Deep Learning | NLP | Generative AI | RAG | Pandas | NumPy | Scikit-Learn | TensorFlow | Power BI | Tableau | AWS Cloud | Streamlit | LLM

PROJECTS

Intelligent Document Assistant

Python | Generative AI | RAG

- Built a **RAG-based application** to search documents and answer questions using the information available in them.
- Used document chunking, embeddings, and FAISS to store and retrieve relevant information from documents.
- Worked on prompt engineering and retrieval flow to improve the relevance of generated answers.
- Created a simple Streamlit interface where users can upload documents and ask questions interactively.

Comment Toxicity Detection

Python | Deep Learning | NLP

- Built an LSTM-based deep learning model to detect toxic comments from text data with reliable prediction results.
- Cleaned and preprocessed large amounts of data using NLP techniques to prepare the data for effective model training.
- Evaluated model performance using **Accuracy, Precision, Recall, F1-Score, and Confusion Matrix** to understand its overall classification performance.
- Developed a Streamlit-based application to test the trained model and generate real-time toxicity predictions from user-provided text.

Content Monetization Modeler

Python | Machine Learning

- Built regression models for YouTube advertising revenue forecasting, on a dataset containing **122,400 YouTube content records**.
- Applied feature engineering, data preprocessing, model evaluation, and performance optimisation.
- Evaluated LR, Ridge, Lasso, DT, and Random Forest algorithms. **Achieved $R^2 = 0.95$ with MAE = 3.11 and RMSE = 13.48** using Linear Regression.
- Achieved strong predictive performance using Linear Regression and ensemble learning techniques.

Luxury Housing Sales Analysis

Python | SQL | Power BI

- Processed and **analysed 100,000+ housing records** through an automated ETL pipeline.
- Identified high-performing builders, micro-markets, and infrastructure-driven booking patterns.
- Performed booking trend analysis, revenue forecasting, buyer segmentation, and sales channel performance evaluation.
- Designed Power BI dashboards featuring KPIs, DAX calculations, drill-down reports, and geospatial visualisations.

EDUCATION

Master Data Science Program with AI

IIT Madras | HCL-GUVI

12/2025 – Present

Bachelor of Education

Tarai B.ed College

07/2022 – 10/2025 | Siliguri

Bachelor of Arts

Salesian College

08/2019 – 04/2022 | Siliguri

CERTIFICATIONS

Master Data Science Program

HCL GUVI

ChatGPT for Everyone

HCL GUVI
